December 25, 1987 Issue 418

DXpedition News

Tahiti - FOØ Mike KI6DF returns to Tahiti (OC-46) as FOØQK Dec. 27-Jan. 1Ø. Check 14180-85 kHz after ØØØØZ, and 14305 at Ø3ØØZ. He'll also be active in the 1Ø M Novice SSB subband. QSL via W6TM with an oversized SASE for a striking QSL (not for the prudish).

Mozambique - C9 Ken SM7DZZ, who did a fine job as 8Q7CH last year, will be in Mozambique in February. He is a friend of the minister who issued the C9MKT license. He'll try to get on the air.

V31MZ recently was K1MZB. QSL K1MZB.

Baker-Howland - KH1 Jim Smith VK9NS reports he has received written permission for his proposed March DXpedition. The operators have been notified. More details soon.

Edited by Chod Harris VP2ML

The DX Bulletin

America's Premier Weekly Amateur Radio Publication

South Orkneys - LU/Z LU1ZA leaves the island (AN-Ø8) in January, but he continues to be very active: 7ØØ5 at Ø2ØØZ and 14Ø35-6Ø at Ø3ØØZ. Try calling a kiloHertz below his CW transmit frequency.

Cayman Is. - ZF2 Dick WD9IIC is on now as ZF2FK (NA-16) through Jan. 2. QSL to K9QVB, not via ZF bureau.

Belize - V3 Art NN7A says he got his call for his Jan 3-7, 1988, DXpedition: V31JZ. QSL Box 2Ø1, Flagstaff AZ 86ØØ2.

Western Sahara - SØ Raama SØRASD has been very active recently, especially in Snookie's Net on 14183 kHz at 18ØØZ. His English is limited to phonetics and signal reports, so use Spanish if you can. QSL EA2JG. The DXAC votes on Western Sahara's DXCC status soon.

Shortly Noted

- Father Moran 9N1MM has been on 14185 at Ø1ØØZ. And the Colvins are in Nepal through January.
- VKØHI on Heard Island (AN-Ø3) continues to operate off a list on 14215 at Ø33ØZ.
- FT5ZB on Amsterdam Is. (AF-Ø2) is often on 7ØØ6 kHz starting at 133ØZ.
- WA9YHW/HR6 on Roatan Is. (NA-57) has a Saturday sked on 1428Ø kHz at 183ØZ. QSL address in Issue 417.
- ZD9BV hangs out on 21264 kHz 163Ø-18ØØZ, but is not fond of pileups, and may vanish unexpectedly. QSL W4FRU.
- The Uruguay DX Group reactivated CXØXY on the South Shetlands this month, which may signal the cancellation of plans to operate from South Georgia. The latter trip was stalled pending transportation.

New York City Packet Cluster

WB2PAG runs the AK1A Packet Cluster© on 145.Ø3 MHz, serving northern NJ, NYC, and southwestern CT. Connect via K2LSX-7. Other active Packet Clusters include the YCCC (New England) and PVRC (Washington DC area). Look for one in northern CA soon.

South Pacific Expedition

The Rambler, a 1Ø6', 3-masted schooner, departs New Zealand Jan. 15 for a 5-month research cruise that includes Pitcairn Galapagos, Cocos, and Revillagigedo. Able bodied crew members (no sailing experience necessary) can join the cruise for $4ØØØ. Contact Thayer Miller, RD2, Box 1Ø4, Harmony PA 16Ø37, or phone (412) 452-5ØØØ.

Visalia Convention

On the program for the International DX Convention April 22-24 in Visalia, CA, is G3FXB, who will speak on his travels within the USSR. You can call the Grosvenor Holiday Inn toll-free at 8ØØ-821-1127 9-4 PT for reservations.

Holiday Greetings

With this issue, The DX Bulletin concludes its 1987 publishing year. There will be no issue next week, as your hard-working editor takes a couple of days off to get reacquainted with his family during this holiday season. Issue 419 will be dated Jan. 8, 1988. Happy holidays to all The DX Bulletin readers, and special thanks to those hundreds of DXers who have supplied DX information, reports, QSL routes, rumors, and letters over the past year. I couldn't do this without you! -ed.

Propagation Watch

[Forecasts for Jan. 5-12 by VP2ML; let's see how I do. -ed.] The New Year should open with some fair-to-good band conditions. Although solar flux levels continue to hover in the 90 range, absorption is expected to remain very low. This translates into lousy conditions on 10 and 12 meters, but fine daylight openings on 15, especially on north-south paths.

The low bands will be the place to be in the next two weeks, especially Jan. 8-10. Compare Bandpass reports on 160 and 80 meters for the Dec. 12-14 period to see what you can expect in January, if the solar conditions repeat on this revolution of the sun. Keep an ear on WWV at 18 minutes after the hour for the latest A and K indices; if the A index is below 10, try the lower bands.

The low planetary absorption means the propagation path over the North Pole is wide open, and long path signals are very good. Look for central Asian stations, India, Pakistan, China, etc.

On the bad news side, we expect a repeat of the badly disturbed conditions of mid-December around Jan. 12-13. The extremely high absorption essentially wiped out the bands. This active solar region has been chopping up the bands for three solar revolutions without diminishing, so look for its return again this time around. The silver lining in this propagation cloud is that the bands tend to be very good just before the storm hits. Watch Jan. 10-11 for above average band conditions. And have a Great '88!

QSL Information

- 9L1CA is via WA3NCP (Oct. '78 op was WA1SQP, now VP2ML!)
- 5L7U in CQWW CW is via OH2KI, Jorma Saloranta, Karhutie 39, SF-00800 Helsinki, Finland.
- HC2CG and HC2GG are via KE7PL.
- Correction: P40T is via KB2HZ. [Sorry about the earlier typos. -ed]
- S92LB is not via WA2LIY. Luiz sent some QSLs to John that had arrived without suitable return postage, to expedite delivery (as opposed to the bureau), and John was considerate enough to remail them, but he has no logs, and cannot act as manager. QSL S92LB direct.

QSL Help Wanted

- VK9ZR for KH6HBZ. VK2CK has passed away, and WA8MOA has no logs. VK2BJL has not answered any correspondence. Any ideas?
- 4'8 TDXB
